Current Role

Frontend Developer (Mid–Senior) Lavan Asia Technology Development – Tehran, Iran	Oct 2024 – Present
<ul style="list-style-type: none">Develop and maintain multiple web applications using modern frontend technologies with a strong focus on reliability and maintainability.Design and implement reusable UI components and shared frontend foundations aligned with design system principles.Contribute to frontend architecture through modular code structure, internal packages, and monorepo-based setups.Work on internal projects involving advanced data visualization, including TradingView-based charts for financial and cryptocurrency-related data.Collaborate closely with backend and design teams to translate product requirements into stable and practical frontend solutions.Improve code quality and long-term maintainability through consistent patterns and reusable abstractions.	

Professional Experience

Frontend Developer

Vira Miner – Tehran, IranSep 2022 – Oct 2024

- Developed and maintained product-oriented web applications using React and Next.js.
- Built complex dashboards including real-time data visualization and interactive charts, leveraging libraries such as Highcharts, with state-driven UI flows.
- Worked with state management solutions to handle dynamic data and user interactions efficiently.
- Collaborated closely with backend developers and UI/UX designers to deliver cohesive and user-friendly interfaces.
- Focused on performance optimization, responsiveness, and overall user experience across applications.

Frontend Developer (Remote - Part-time)

Mecurus – Singapore (EU-based Founder)Jul 2022 – Present

- Developed and maintained frontend features using Next.js and TypeScript.
- Built reusable UI components aligned with design requirements.
- Worked closely with UI/UX designers to improve usability and accessibility.

Web Developer (Freelance)

Independent ProjectsMar 2015 – Present

- Designed and developed web applications and websites for various clients.
- Delivered React-based frontend solutions and custom WordPress implementations.
- Focused on performance, maintainability, and SEO best practices.

Selected Projects

Crypto Mining Pool & Dashboard

Role: Frontend Developer

Context: Product-based platform for monitoring mining activity and user balances.

- Designed and implemented a responsive dashboard with real-time data updates, charts, and state-driven UI flows.
- Integrated frontend with backend APIs to display live statistics and user-specific data.
- Focused on performance, clarity of data presentation, and maintainable component structure.

Tech: React, Next.js, Redux, Chart libraries

E-commerce & Product Platforms

Role: Frontend Developer

Context: Development of scalable frontend solutions for product-driven web applications.

- Built reusable UI components and page layouts for product listings, dashboards, and landing pages.
- Implemented responsive and accessible interfaces aligned with UI/UX designs.
- Improved frontend maintainability through component-based architecture.

Tech: React, Next.js, Tailwind CSS

Custom WordPress Solutions

Role: Web Developer

Context: Custom-built websites and platforms for various businesses.

- Developed custom WordPress themes and plugins from scratch based on project requirements.
- Implemented SEO-friendly and performance-optimized frontend structures.
- Collaborated with clients to translate business needs into practical technical solutions.

Tech: WordPress, PHP, JavaScript, CSS
